

Top tips for Making Progress in Computing

- Be prepared for all areas of work in computing and have the correct equipment e.g. Pen, ruler, pencil. Remember not all computing lessons are on the computer!
- Always use your planner for important dates such as practical lessons, assessments, extra catch up sessions
- Practice skills at home including programming skills and using different types of software.
- Complete at least three home learning tasks per half term
- Have a positive attitude and try your best all the time

Challenge Beyond the Classroom

- Read books about programmers and famous people who have made a name for themselves in the world of technology, this may give you ideas about designing and making
- Look at GCSE exam papers in the computing area and get used to question styles and techniques
- Join programming club on Wednesdays with Mr Noble and Mr Mellor to develop skills and ideas.
- Try out advanced skills and produce products that use these skills, email them to your self or show screenshots of them and bring them into school
- Research into different languages used in Computing and produce a booklet that would be useful to you in lessons
