

Top Tips for Making Progress in Technology

- Be prepared for practical work in all areas of Technology - have the correct equipment e.g. containers, aprons
- Always use your planner for important dates such as practical lessons, assessments, extra catch up sessions
- Practice skills at home including cooking skills, drawing skills, working with wood
- Complete at least three home learning tasks per half term
- Have a positive attitude and try your best all the time

Challenge Beyond of the Classroom

- Read books about influential Product, Textiles and Graphic designers, and Food producers to give you ideas about designing and making
- Look at GCSE exam papers in the Technology area you are most interested in to get used to question styles and techniques
- Join a Technology Flexible Learning club to develop skills and ideas
- Try out advanced skills and produce products that use these skills, photograph them or bring them into school
- Research into different materials used in DT and produce a booklet that would be useful to you in lessons
